NEW SOUTH WALES

Facilitates Farming by Giving Ample Agricultural Training.

Not only does the farmer of New South Wales enjoy the unparalleled advantages afforded by nature in the gift of a mild climate, where it never freezes except in the highest moun tains, where fodder grows the year around, and shelter is not necessary to protect the stock, but he is also provided by the State with every opportunity for learning the scientific and practical side of farming. The Government of New South Wales has a large number of Experiment Farms established for the purpose of aiding the beginner, and of advancing knowledge in an industry upon which the

A dozen or more of these State Farms are open to students, one of the best known being the Hawkesbury Agricultural College, at Richmond thirty-eight miles from Sydney, which has an experiment farm of 3,500 acres. supplied with all the most modern farm equipment. Its 300 students. taking a two-year course, not only acquire a theoretical knowledge of agriculture through a study of chemistry, ootany, bacteriology, etc., and their application to farm work, but also get the most practical kind of training in the various branches of farming-horticulture, beekeeping, poultry farming, carpentry, blacksmithing, harness making, engine driving and the use of electricity. At Grafton, on the Clarence River, special work is done in sheep and dairy farming, and in the culture of grasses and other fodder plants. Others of these Experiment Farms specialize in various subjects, such as Irrigation farming, fruit and vine culture, wheat breeding, pig raising, etc., in an effort to ascertain the most suitable economic plants and animals to be grown in particular districts in

which these farms are situated. Farming is coming to be recognized as a profession calling for the best brain power a man has, and the best training he can bring to it. New South Wales, realizing this fact, is offering by means of these numerous Experiment Farms, a splendid opportunity to the farmers to secure scientific trainng, and to reap the benefits of the latest experimental work in agriculture. The House of Whispers

WILLIAM JOHNSTON

IRWIN MYERS

Copyright by Little, Brown & Co. "WHO SHOT HER?"

Synopsis.-Spalding Nelson is oc cupying the apartments of his great-uncle, Rufus Gaston. The Gastons, leaving on a trip, tell him about mysterious noises and "whis pers" that have scared them. He becomes acquainted with Barbara Bradford, who lives in the same big building. He instinctively disand distrusts the superint The mysteries in his apartments begin with the disap-pearance of the Gaston pearls from the wall safe. He decides not to call in the police, but to do his own investigating. It is soon evident that someone has access to his rooms. Becoming friendly with Barbara, he learns that her apartments are equally mysterious. Sha tells him that several years before her sister Claire, who lives with her, had made a run-away marriage with an adventurer, from whom she was soon parted, and the marriage had been annulled. Claire is engaged to be married and some-one has stolen documents concern-ing the affair from the Bradford apartment and is attempting to blackmail the Bradfords. Nelson takes Miss Kelly, the telephone girl, to dinner with the idea of pumping her. Gorman, a hotel de-tective, recognizes her as the wife of Lefty Moore, a noted burglar. Nelson tells his story to Gorman and puts the case in his hands. Nelson finds a secret passage, with a panel door in his room. He real-izes he loves Barbara. He and Barbara hear a shot in the build-

CHAPTER VII-Continued.

I sprang after her, but she moved so quickly that she was out of the window and safely home before I could stop her. Only waiting to see her off the ledge I turned back and hastily pulling the panel into place I dashed for the front of the house. The screams and the shots I was sure had come from the apartment directly below mine. I was certain that there had been murder done there, and my mind was made up to investigate it at once. If I moved quickly there might be an opportunity to catch the murderer red-handed. I let myself out and dashed down the one flight of stairs. As I arrived there, the ascending elevator stopped, and Mr. Wick burst out, followed by an excited elevator runner. Wick was carrying a

revolver in his hand. "Did you hear anything?" he asked excitedly.

apartment and then a shot." "I heard it, too. In which apartment "Right here," I said, pointing to the

"Miss Lutan's," he said. "Let's go in. Here's my pass-key. You open the door. I'll be right behind you with my revolver."

CHAPTER VIII.

Inserting the key Mr. Wick handed me, I turned it sharply and flung the door wide. It revealed a luxuriously furnished apartment, the front rooms of which were extravagantly ablaze

with light. For a moment the three of us. Mr. Wick, the elevator boy and myself, I do not admit to being a coward, the | alone?" unknown has its terrors for all of us, and I must confess that the knowledge that has been with her for years." that Mr. Wick had his revolver drawn was indeed comforting. door, my fingers sought the button, There was no one there, but my one the one in the apartment above, was standing wide open,

Quirkly I sprang to inspect the room corresponding to mine, a room, it will be recalled, opening off the sitting room. Here, too, was darkness, and as I turned on the lights, I stood aghast with horror.

On the floor, close up to the inner wall, lay the contorted body of a beautiful young woman. Her eyes were wide open and staring. One arm was twisted under her, and the other hand was clutching at the front of her had heard.

"It's Miss Lutan," said Mr. Wick's voice behind me. "She's been murdered," I cried; "get the police at once."

As I bent over her to see if there was any evidence of life, I saw imprinted in her tender white throat the marks of her assailant's brutal fingers. "Come," I said, "help me lift her on to this couch, and then telephone at once for a doctor."

standing there, staring at the body as Who shot her?" if stupefied by the tragedy, but he obeyed my directions, and with him at Wick, as if suspecting that it might her feet and I at her head we laid her have been one of us, down on the couch, where I proceeded to loosen her gown and to try by arti- utes agq." "There's no one here," I said, as we completed our round of the various rooms. "The murderer has made his escape. Hasn't that boy 'phoned for the police yet?"

ing out my suggestion about the police that I think he must have sensed the suspicion in my voice. "I think I had better ask Mr. Kent about it first," he said nervously.

"Who's Mr. Kent?" I demanded. My thoughts were so taken up with the unexpected tragedy that the name at first meant nothing to me. Suddenly I remembered. It was to the apartment of Mr. Henry Kent that Miss Kelly had 'phoned last night when she was dining with me. I recalled, too, that Gorman had charged me to find out all I could about him. "Who's Mr. Kent?" I repeated

sharply. "What's he got to do with it?" "He's the owner of the building," explnined Mr. Wick. "He doesn't like the Granddeck to be mentioned in the a wave of his hand. papers. He says any notoriety is bad for its exclusiveness. I don't believe he'd want the police called in. In fact, sir. I'm sure he wouldn't."

"Whether he wants it or not." I said you call the police right away or else I will.

in her apartment," I heard him say. "Mr. Nelson and me just discovered her body. What's that, sir?" Just what Mr. Kent's reply on hearing the shocking news had been I had, of course, no means of knowing, but

whatever it was, over the superintendent's face came an expression of incredulity and amazement. "What do you think," said Mr. Wick, turning to me: "he says for me to call up Headquarters at once."

"Of course," I said, "it is the only thing to do." Nevertheless, as Mr. Wick waited for the number, he kept shaking his head and muttering under his breath

something that sounded like: "To think of his telling me to call in the police!" With the doctor summoned and the police sent for, there seemed to be little else for us to do but wait, so Wick and I sat down together in the

rear sitting room with the elevator boy still on guard at the door. "Who was Miss Lutan?" I asked. "Why, Daisy Lutan, the actress," said Mr. Wick in surprise. "I supposed every one knew her."

"I've heard about her." I hastened to stood there with our ears alert for say, "but I had no idea that she lived any sound from the apartment. While in the Granddeck. Did she live here

"Were there any signs of the bur-"No, we looked all through the apartment and found no one."

"Was anything missing?" I walted with bated breath to hear f Wick would tell of having found the wall safe onen. If he did not I felt it would be conclusive evidence that there was something he was trying to conceal.

"I didn't notice anything missing." he said glibly. "I wouldn't know, anyhow. I don't know what stuff she had here. "Who would know?"

"Her maid might. She's out now. Generally she's home by eleven "Did she keep only the one servant?"

"Only the maid and a chauffeur." "Then she was all alone in the partment?" "Yes. She'd gone out all dressed up about seven in her own car. She came

home unexpectedly in a hired taxi not more than half an hour ago." "Did she come home alone?" "Sure she was alone. At least the hall boys told me so. I did not see her

come in, myself." More and more I was convinced that Wick was lying. I was sure he knew far more about affairs than he was admitting. Why did he keep harping on the fact that Miss Lutan had come in "unexpectedly?" What means had he of knowing what time she was expected home? Furthermore he said he was in the elevator when he heard the screams and the shot. I did not belleve it would have been possible for the sounds to have carried that far. The walls were all deadened, and the room where the tragedy had taken

place was at the back of the house many feet distant from the elevators. I wondered if the burglar had not been in the place with Mr. Wick's connivance, while he stood guard outside. As he heard me coming he might have taken refuge in the elevator. And why did he have his revolver so con-

veniently ready? The detective who had been questioning Wick turned to me. "Who are you?"

"Spalding Nelson." "What do you do? Where do you work?" "I'm a clerk." "A clerk living at the Granddeck

apartments," he sneered, "You must have a good job." "I haven't any at present," I replied. "I'm living here in Mr. Gasand as the flare of light illuminated man who had killed Miss Lutan had I could see that my statement that

> "Will you explain what you were dodemanded with a growing suspicion in

"That's easy to explain," I retorted. this one. I heard her scream and then the shot. It seemed to come from the floor right below me, so I ran down to investigate." "Is that right?" he asked, turning to Mr. Wick.

The net about Nelson is drawn closer.

(TO BE CONTINUED.)

Olive-Growing Centers, Of all the olive-growing lands Spain is the most important in the total yield of oil, and is by nature one of those best fitted to fill its own large demands and furnish an increasing supply for export. JONATHAN AND HIS ARMOR-BEARER. LESSON TEXT—I Sam. 14:1-46.
GOLDEN TEXT—For the promise is
unto you and your children, and to all
that are afar off, even as many as the
Lord our God shall call.—Acts 2:29.

ADDITIONAL MATERIAL-I Sam. 13 PRIMARY TOPIC-A Story of a Brave JUNIOR TOPIC-How Two Men Put an INTERMEDIATE AND SENIOR TOPIC Our Foes and How to Overcome Them. YOUNG PEOPLE AND ADULT TOPIC -The Value of Initiative in Christian

I. Israel's Reduced Condition (vv.

The Philistine oppression had become so terrible that the king had only about 600 men, and they were completely disarmed, except that Saul and Jonathan had each a sword and spear. Lest the Israelites should make unto themselves swords and spears the Philistines took from them their smiths; they only left them a file to sharpen their instruments of husbandry. This left them under the necessity of going to the Philistines to have their tools sharpened. Saul himself was in hiding. Because he had presumptuously intruded into the priest's office God rejected him. While in this desperate condition God moved Jonathan to go against the Philistines. II. Description of the Passageway

Between Israel and the Philistines (vv. 4, 5). Over against the way which Jonathan and his armorbearer had to traverse, on either side lay sharp rocks called Bozez and Seneh. The opposing camps were probably three miles apart. It required great effort to scale the cliff. The feat of Jonathan and his armorbearer was one of the

most daring ever attempted. III. Jonathan's Resolution to Go Against the Philistines (vv. 6-10.) 1. Jonathan's summons to the young man (v. 6). Here the thought of verse one is resumed, verses two to five being parenthetical. Jonathan did not doubt but that the Lord was leading him. He recognized his covenant relationship with God, and therefore his claim upon him as against the uncircumcised Philistines, asserting that "there is no restraint to the Lord to save by many or by few." God is allpowerful, so with him numbers cut no figure. Whatever he wills for us he can do. One with God is a majority. One going out in the energy of the living God shall chase a thousand and two shall put ten thousand to flight (Deut. 32:30).

2. The noble response of his armor bearer (v. 7). He was actuated by the same faith and courage as Jonathan and entered heartily into the undertouching anything in the name of Christ it shall be done (Matt. 18:19,

20). 3. Watching for the will of God (vv. 8-10). Doubtless the same Spirit who had moved Jonathan to go had instructed him to watch for the Divine leading. The sign that God would deliver the Philistines into their hands was the invitation for Jonathan and his companion to come up to the Philistines. They did not go forward until the sign of divine leading was given. The walk by faith means that we stand still at times to ascertain the will of God, but it also means that we take the steps as indicated.

IV. Jonathan's Marvelous Victory (vv. 11-16). Being assured of the divine leading. Jonathan with his armorbearer sprang forward saying that the Lord had delivered the enemy into the hands of Israel. He did not say "into our hands," but "into the hands of Israel." This is a fine touch of humility; it shows that it was zeal for God, not selfish ambition that impelled him to go forth. God interposed by a great earthquake, causing consternation among the Philistines, moving them to

destroy each other.

V. Saul's Foolish Behavior (vv. 1. His carnal zeal (vv. 17-23), After the Lord had given the victory at the hands of Jonathan, Saul called for the ark of God to be brought, after which he went forth in pursuit of the enemy

who had already been routed. 2. His foolish obligation imposed (vv. 24-30). It was that a curse would be upon any one of his soldiers who should stop to eat on that day. Fasting is proper at times, but it was the height of folly to demand strenuous service of his soldiers without the

necessary nourishment. 3. His determination to kill Jonathan. Jonathan not having heard this rash oath, partook of the honey as he passed through the woods and was greatly refreshed. When this was reported to Saul he was about to take the life of his own son, who had so gloriously wrought in the deliverance of his people.

Two Sacraments

In the church of Christ there are two sacraments-the material of one is the commonest of all elements, water: the form of the other the commonest of all acts a meal. Now there are two ways in which reverence may be manifested toward anything or person: One, by exalting that thing or person by means of the depreciation of all others; another, by exalting all others through it. The sacraments are honored when they consecrate all things and acts of life .- F. W. Robertson.

If we care to live and walk in the heavenly forces and to taste the sweet ness of the true, beautiful, and the good, we must make inward room for selves to familiarity with the higher subjects. Evidence of Things Unseen. No pure and simple life, true to itself, true to its maker, was ever lived

on this earth that was not a voice on

God's behalf, however still and small,

and that did not, in its sincere and

evidence of things unseen.-Alexander Doing Evil Deeds. The disposition to do an evil deed

RABBIT RAISING IS GOOD SCHEME

American People Beginning to Realize That Weat Is Superior for Home Table.

LITTLE CAPITAL IS NEEDED

Back-Yard Enterprise Turns Waste Materials and Spare Time Into Food-Selection of Breed Is Matter of Taste.

(Prepared by the United States Department of Agriculture.) Rabbits have always been an imporin the United States until recently the winter hunting season. Conditions resulting from the great war have awakened many Americans to the conomic value of rabbits and more sufficient in their back yards to supply the wild rabbits. It closely resembles and easy to gather.

Rabbits Are Easy to Handle.

done on an area 4 by 6 feet. Half an hour of time a day, and some hay, roadside weeds, and refuse from orchards, garden, and kitchen, supplemented by a small quantity of grain, cover the cost of production. Raising rabbit meat for home consumption is a proposition for turning to recount time, space, and materials which are ordinarily wasted. Cost of Rabbit Raising.

The cost of starting a rabbitry de-

pends on its size and on the price of

material. One can buy two good does and a buck of breeding age-enough to supply an average family with all the rabbit meat it would care to use -for anywhere from \$1.50 to \$10 each, r for a total of from \$4.50 to \$30. Hutches may vary in cost from a ew cents each, the price of an empty dry-goods box, to several dollars, if expended for dressed lumber to be put lime and considerable potash, but together by a carpenter. On a farm should not be applied at the same time where odds and ends of lumber and poultry netting usually are available, as a means of lightening heavy soils. and where hay, grain, and milk are However, they have very little fertilproduced in abundance, the money cost of starting and carrying on a

small rabbitry is negligible. In any case the initial cost need not be great. The daily cost when all feed is purchased is not usually above 1 cent for a 10 or 12 pound rabbit, a recent bulletin on rabbit raising, published by the bureau of biological survey of the United States department of agriculture, states. Selecting a breed is a matter of taste, although it may be influenced more or less by the market that is to

oping that into stock that may be a source of pride and profit. One buck and two or three does are enough to start with. Young animals tive trees and shrubs and those known of breeding age are better than older by trial to thrive in the locality are

ones, which will soon be past their the best to use,

Rabbits Respond to Good Treatment usefulness. The buck should come from a different source from the does. It is always best to deal with reputable breeders and to examine stock be-

fore buying it. Feeding the Rabbit. American breeders follow no uniform system of feeding rabbits. Some feed no green stuff, while others use all that is available. It is usually wise to avoid both extremes, but green feed must be used with more caution than is necessary with dry, and only the best of any kind should be used. This means particularly that spoiled, moldy, or dirty feeds are to be avoided

as injurious to rabbits. Clean oats (whole or crushed) bright well-cured hay, and a small portion of some kind of greens daily is the steady diet used in most rabbitries. Crushed barley may be substituted for oats; clover or alfalfa may be used with green oats or timothy hay; and the greens may consist of carrots, rutabagas, prunings from apple and cherry tress, and plantain, dock, burdock, dandelion, canliflower, lettuce, or lawn clippings. Spirit, if we care to be receptive of Lawn clippings or other green grass should be clean and not fed when of Bordeaux mixture and arsenate of moldy or fermented. Dandellon tons lead is also effective. The vines may and roots not only have a food value, be sprayed just before they bloom; as the best things, we must exercise our but are useful on occasion because of soon as the blossoms fall, and a third their medicinal properties. A variety time two weeks after the second ap-

of feed is essential. Benefit of Humus. Humns binds together the soil pardrying by wind or washing by rain.

Equipment that saves time and labor and affords a cleaner product from your dairy is economical. Drinking Water Essential. Drinking water, plentiful and warm

production.

ADVISABLE TO PRUNE AND STAKE TOMATOES

Question Is Asked Every Year By Many Gardeners.

Advantages Are That Larger Number of Plants Can Be Set on Given Area-Quality of Fruit Is

Usually Much Better. Does It pay to prune tomato vines to a single stem and tie them to stakes or to a trellis? This question is asked every year by thousands of home gardeners. It does pay, according to United States department of agriculture specialists, especially if the space for garden purposes is limited, and it is desired to make the best use of it. Tomato plants, if left ant source of meat in Europe, but to themselves, have a habit of spreading all over the garden and of producfew of them were eaten except during ing their fruit right on the ground, where it becomes covered with dirt

every time there is a rain, Advantages of pruning and staking tomatoes are that a larger number and more people each year are raising of plants can be set on a given area than by the ordinary method; the fruit the family table. The flesh of the will ripen a little earlier on the plants young domesticated rabbits is vastly that are pruned and staked; and the superior in fiber and flavor to that of fruit is held off the ground, is clean,

While the individual plants do not produce so large a quantity of fruit raise in a year 20 young, which at 5 as when they are allowed to spread pounds of delicious meat. By means as many plants can be set on a given of compound hutches all this can be area, thereby actually increasing the quantity of tomatoes produced. The quality of the fruit is usually better on the plants that are pruned and

tled to stakes. Small round poles about four feet in length, sharpened at one end, make the most desirable tomato stakes for the home garden. The best proof that staking tomatoes pays is found in the fact that the best home gardeners follow the practice.

LIME REQUIREMENTS OF SOIL

As General Rule Application of Small Quantity Will Be Beneficial-Ashes Help Some. There is no certain means by which the average gardener can determine

the lime requirements of his soil. As a general rule, however, the application of a small quantity of lime will be beneficial. This should be at the rate of from one-half bushel to one bushel of air-slaked lime to a square rod of ground. The lime should be applied after the land has beeen plowed or spaded and while it is being raked and fitted for planting. It should always be borne in mind that no lime should be put on the land

nor should the lime be applied at the same time as commercial fertilizers or poultry manure, as it has the faculty of liberating the nitrogen contained in the fertilizer and causing it to be lost in the air. Unleached wood ashes contain some as the lime. Coal ashes are beneficia

that is to be planted to Irish potatoes

izer value, the United States department of agriculture says.

GOOD FARMSTEAD PLANTINGS Trees Are Used for Windbreaks and Shade, While Shrubs Are Needed to

Cover Unsightly Spots. Suitable plantings are necessary to unite the parts of a farmstead into a pleasing, homelike whole, says the United States department of agriculture. Trees are used for windbreaks, be supplied. For example, the family as frames for the buildings or a backtable would demand smaller animals than would the trade of a restaurant ground for them, and to give shade. Shrubs are needed in abundance to or hotel. It is best to begin with only hide partially the foundation lines of one breed and to concentrate on develbuildings, support their corners, give reasons for turns in drives or walks. and to screen unsightly objects. Na-

IMPROVEMENT OF DAIRY HERD Statement From Virginia Owner Reflects Sentiment for Upbuilding

of Live Stock. "I disposed of one scrub bull and replaced him with a registered Holstein to build the herd up." This statement from a Virginia dairyman reflects sentiment of improving live stock in the Old Dominion state, says the United States department of agriculture. The dairyman is enrolled in the "Better Sires-Better Stock" movement in which Virginia now leads all other states from the standpoint of number of persons agreeing to use nurebred sires for all classes of stock

WHEAT SILAGE IS SUPERIOR

kept.

Has Feeding Value Approximately the Same as Corn-No Special Precautious Needed. Wheat is used to some extent for

silage and supplies a silage of reasonably good quality, having a feeding value approximately the same as corn stlage. It should be put into the silo when the wheat grains are in the dough stage. No special precautions are necessary to insure a proper preservation.

SUPERIOR SPRAY FOR GRAPES Combination of Bordeaux Mixture and Arsenate of Lead Is Sug-

gested as Effective.

Bordeaux mixture is excellent for use on grapes. A combination spray plication.

Ignorance No Excuse. Ignorance is no excuse for fallure ticles and thus prevents the soil from as a dairyman. There are too many good books and papers published upon the subject these days. Mistakes With Strawberries.

> home use, is in selecting plants from an old neglected bed. Humus Opens Clay Soll.

One of the most common mistakes

in growing strawberries, especially for

in winter, cool and fresh in summer, Humus permits air to enter heavy is an absolute essential to heavy milk clay soils more readily.
